EN: FLAMLUX – USER MANUAL

Note: This instruction manual contains important information. Please read it carefully and keep it for future reference.

PARTS LIST

• 2 × Solar Flame Lights

HOW DOES THE SOLAR-POWERED LIGHT WORK?

During the day, the solar panel converts sunlight into electricity and recharges the battery. At night, the light will automatically turn on if the switch is in the "ON" position. (You can also cover the solar panel with your hand during the daytime to check if it is switched on.)

ADDITIONAL NOTES

- 1. Before first use, charge the lamp under direct sunlight for at least 8 hours to fully recharge the battery. Otherwise, the light may not turn on, or its working time may be reduced due to power loss during long storage or transportation.
- If the lamp has not been exposed to sufficient sunlight for over 3 months, the battery may be exhausted. Please recharge it under direct sunlight. Once fully charged, it will function normally.
- 3. The lighting duration depends on your geographical location, weather conditions, and seasonal sunlight availability. The light will last longer in summer and shorter in winter. On rainy or cloudy days, illumination time will also be reduced. For optimal performance, clean the solar panel regularly with a soft, damp cloth and a neutral cleaning solution.

SAFETY WARNINGS

- 1. This product is intended for decorative use only.
- 2. Do not dispose of the battery in fire, as it may explode or leak.
- 3. Do not expose the battery to direct heat, open flame, or immerse it in water to avoid the risk of explosion or leakage.
- 4. Recycle or dispose of the battery in accordance with local regulations.
- 5. Assemble the lamp only as described in this manual. Improper assembly may cause hazards.

- 6. Do not attempt to disassemble the device, as this may damage the product.
- 7. This product is not a toy. Keep it out of reach of children, or use only under adult supervision.

TROUBLESHOOTING

If the light does not automatically turn on at night after daytime charging, check the following:

- Ensure the power switch is in the "ON" position. (Cover the solar panel completely with your hand; if the light turns on, the switch is correctly set.)
- Confirm that the solar panel is installed in a location with direct sunlight and is not shaded.
- Check that the surface of the solar panel is clean. Dust and dirt reduce charging efficiency. Clean it with a soft cloth when necessary.

INSTRUCTIONS FOR RECYCLING AND DISPOSAL:

This label means that the product cannot be disposed of as other household waste throughout the EU. To prevent potential damage to the environment or human health from uncontrolled waste disposal. Recycle responsibly to promote the sustainable use of material resources. If youwant to return a used device, use the drop-off and collection system, or contact the retailer from whom you bought the product. The retailer can accept the product for environmentally safe recycling.

A declaration by the manufacturer that the product complies with the requirements of the applicable EU Directives.
