EN: TRIMYON – USER MANUAL

PRODUCT OVERVIEW

TRIMYON is a compact, rechargeable electric shaver with a rotary shaving head and a battery display. It is charged with a USB Type-C cable. The device is protected against water jets (IP66), so the shaving head can be rinsed under running water.

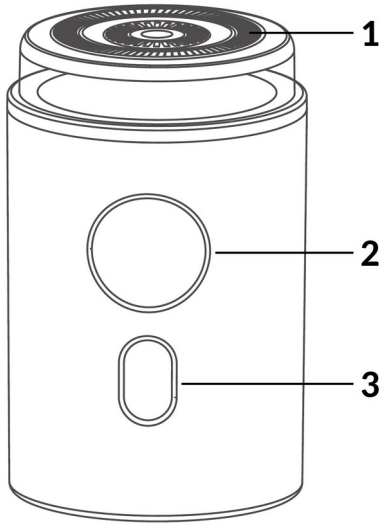

PRODUCT SPECIFICATIONS

Product name: TRIMYON
Model number: SD-2
Battery: 3.7 V, 300 mAh, 1.11 Wh (built-in, rechargeable)
Charging method: USB Type-C
Input rating: 5V ⎓ 1A
Rated power: 2 W
Charging time: approx. 30 minutes
Water protection: IP66

PACKAGE CONTENTS

- TRIMYON shaver with protective cover × 1
- USB Type-C charging cable × 1
- Cleaning brush × 1
- User manual × 1

PARTS AND CONTROLS

1. **Shaving head**
2. **Battery display**
3. **On/Off button**

The USB Type-C charging port is on the bottom of the device.

OPERATING INSTRUCTIONS

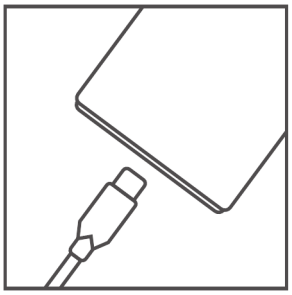

1. Remove the protective cover from the **Shaving head**.
2. Press the **On/Off button** to switch the device on.
3. Pull the skin taut with your free hand so that the hairs stand upright.
4. Place the **Shaving head** gently on the skin. Move it slowly against the direction of hair growth, using straight or circular movements.
5. After shaving, switch the device off, clean it and put the protective cover back on the **Shaving head**.

Your skin and beard may need 2–4 weeks to adapt to the shaving system of this device.

CHARGING

Fully charge the device before first use and when it has not been used for more than one month.

1. Switch the device off. Do not charge the device while it is switched on.
2. Insert the USB Type-C charging cable into the charging port on the bottom of the device. Make sure the plug fits the port properly.
3. Connect the other end of the cable to a USB power supply (5V ⎓ 1A). Charging starts.
4. During charging, the **Battery display** shows the battery level.
5. When the battery is fully charged, the **Battery display** shows 99 and stays lit. Disconnect the charging cable.

- Use the original USB Type-C charging cable.
- Do not charge the device for longer than 12 hours. Do not leave it connected to the power supply for long periods.
- Use, charge and store the device at temperatures between 5 °C and 35 °C.
- If the device is not used for a long time, charge the battery at least once every six months.

BASIC SAFETY INSTRUCTIONS

- Read this manual carefully before using the device and the charging cable. Keep it for future reference.
- Switch the device off when it is not in use.
- The device can be used in the bathroom. The charging cable is not waterproof: keep it dry and never rinse it or put it in water.
- Make sure the device and the charging cable are dry before connecting them.
- Do not disassemble, repair or modify the device. This can cause fire, malfunction or injury.
- The shaving foil is very thin. Do not press hard on it and protect it from hard or sharp objects. A damaged foil can injure the skin.

- Do not use the device if the shaving head is damaged or worn. Replace it only with an original part.
- Do not expose the device to high temperatures or direct sunlight.
- Children and people with reduced physical, sensory or mental capabilities, or without the necessary experience and knowledge, may only use, clean and maintain the device under the supervision of a responsible person.
- Children must not play with the device.

BATTERY SAFETY

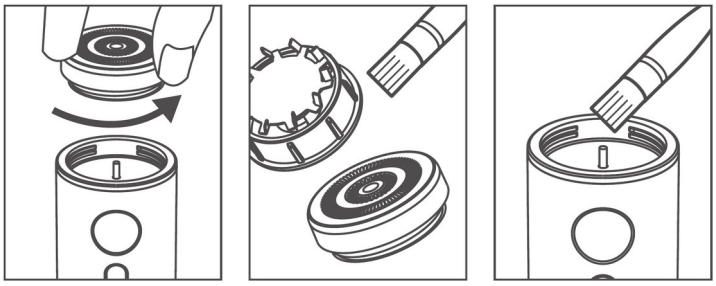

- The device contains a built-in rechargeable battery. Do not open the device or try to remove the battery.
- Never throw the device into fire and do not expose it to high temperatures.
- If the device becomes unusually hot, swells or gives off a smell during charging, disconnect it immediately and stop using it.

CLEANING AND STORAGE

Clean the device regularly for the best shaving results. Switch the device off before cleaning.

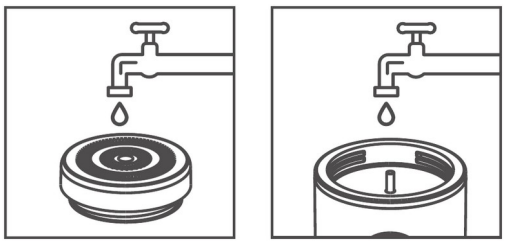

Cleaning with the brush

1. Turn the **Shaving head** anticlockwise and remove it.
2. Brush the hair out of the **Shaving head** and off the top of the device with the cleaning brush.
3. Refit the **Shaving head** and turn it clockwise until it is tight.

Rinsing with water

1. Remove the **Shaving head** as described above.
2. Rinse the **Shaving head** and the top of the device under clean running water. You can rinse the cleaning brush at the same time.
3. Dry the body of the device with a cloth. Let the **Shaving head** dry naturally without the protective cover.
4. Refit the **Shaving head**, turn it clockwise until it is tight and put the protective cover on.

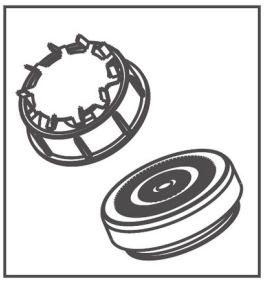

- Do not soak the device in water.
- Do not use salt water, water hotter than 50 °C, thinners, petrol, alcohol or other chemicals.

- Handle all parts gently to avoid damage.
- If your skin is very dry, or after cleaning the shaving head with a degreasing cleaner, apply a drop of lubricating oil to the blades.
- Store the device with the protective cover on, in a dry place away from direct sunlight.

REPLACING THE SHAVING HEAD

For the best shaving results, replace the shaving head once a year, or earlier if it is damaged or worn. Use only an original replacement shaving head.

1. Switch the device off.
2. Turn the **Shaving head** anticlockwise and remove it.
3. Remove the blade holder from the **Shaving head** (see figure) and replace the **Shaving head** with a new one.
4. Refit the **Shaving head** and turn it clockwise until it is tight.

INSTRUCTIONS FOR RECYCLING AND DISPOSAL:

The device contains a built-in rechargeable battery that may contain substances harmful to the environment. Do not dispose of the device with household waste. Take it to a collection point for waste electrical equipment and batteries.

This label means that the product cannot be disposed of as other household waste throughout the EU. To prevent potential damage to the environment or human health from uncontrolled waste disposal. Recycle responsibly to promote the sustainable use of material resources. If you want to return a used device, use the drop-off and collection system, or contact the retailer from whom you bought the product. The retailer can accept the product for environmentally safe recycling.

CE

A declaration by the manufacturer that the product complies with the requirements of the applicable EU Directives.
